

SIMRAN GOYAL

Vidisha, Madhya Pradesh

+91-9302243804 goyalsimran791@gmail.com LinkedIn GitHub LeetCode HackerRank

PROFESSIONAL SUMMARY

- Final-year B.Tech student with a good foundation in Data Structures, SQL, and database management. Proficient in problem-solving using C and Python, with strong communication skills and a proactive, team-oriented mindset. Particularly interested in working with databases and data analysis, with a good understanding of SQL and data handling concepts. Familiar with building basic web applications and working with version control tools like Git. Eager to contribute to development, testing, and troubleshooting activities while continuously learning and adapting to new technologies. Seeking an opportunity to grow.

EDUCATION

Samrat Ashok Technological Institute

B.Tech – Internet of Things — CGPA: 7.65

Nov 2022 – June 2026

Vidisha, Madhya Pradesh

TECHNICAL SKILLS

- Programming Languages:** C, Python, SQL
- Data Structures & Algorithms:** Problem Solving using C/Python, Arrays, Strings, Basic DSA Concepts
- Web Development:** HTML, CSS, Basic UI/UX Design Principles, Responsive Design (Familiar with React.js and Flask)
- Databases:** MySQL, Database Design, CRUD Operations
- Tools & Platforms:** Git, GitHub, VS Code, Linux (Basic)
- Core Concepts:** Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Organization & Architecture, Basics of IoT and Arduino

PROJECTS

Arduino-Based Automatic Pill Dispenser

Tech: Arduino Uno, Servo Motor, C/C++, IoT GitHub

- Developed a time-triggered automated pill dispenser using Arduino for scheduled medication delivery
- Implemented sensor validation and actuator control using RTC module, servo motor, and buzzer
- Optimized hardware–software integration for reliable scheduling and improved system accuracy

GATE Preparation Tracker Dashboard

Tech: Python, SQL GitHub

- Built a dashboard to track preparation progress with data visualization
- Used Pandas and Matplotlib to analyze performance trends
- Implemented secure authentication using password hashing

KrishiSarthi

Tech: React.js, CSS GitHub

- Developed a frontend platform for secure and transparent contract farming between buyers and farmers.
- Developed RESTful APIs using Flask and integrated a multilingual AI chatbot for real-time query handling.
- Designed a responsive UI using React.js and Tailwind CSS for better user experience.

Hospital Management System

Tech: SQL, HTML, CSS GitHub

- Developed a web-based system for managing patient records and appointment scheduling
- Implemented backend logic using Flask and handled data storage with SQLite
- Designed a responsive UI using HTML and CSS

Tic Tac Toe Web Game

Tech: Python, HTML, CSS GitHub

- Developed an interactive Tic Tac Toe web application with game logic and turn-based interactions
- Handled win/draw conditions and ensured smooth user experience

INTERNSHIPS

Recent Trends in IT Internship [Certificate]

17 July 2023 – 28 July 2023

Samrat Ashok Technological Institute, Vidisha

- Gained exposure to emerging technologies including machine learning, embedded systems, and data handling
- Developed understanding of industry-relevant tools and concepts

Accenture North America – Data Analytics Virtual Internship [Certificate]

10 July 2024

- Performed data cleaning and visualization on real-world datasets
- Identified trends and generated insights using structured analysis

Data Analytics Job Simulation Certificate [Certificate]

2024

- Worked on dataset exploration and generated data-driven insights
- Applied analytical reasoning to solve business-related problems

ACHIEVEMENT & INVOLVEMENTS

- **SIH 2024 – National Finalist:** Selected at national level for developing an ML-based web crawler system
- **WittyHacks 4.0:** Built a smart solution during a 36-hour hackathon
- **HackJKLU 2025:** Developed an IoT-based grain quality analyzer using ML
- **Volunteer:** Contributed to Young Scientist Congress and SIH event coordination(college level)
